

## **Pacific Empire Commences Drilling at Weedon Copper-Gold Property with Assays Pending from Worldstock Drilling**

**September 9, 2020 - Vancouver, BC, Canada** - Pacific Empire Minerals Corp. (TSXV: PEMC) (OTCQB: PEMS) (“Pacific Empire”, “PEMC” or the “Company”), a hybrid prospect generator focused in British Columbia, is pleased to announce the start of reverse circulation (“RC”) drilling activities at the Weedon Property in central British Columbia, 80 kilometres north of the city of Prince George and 85 kilometres southeast of Centerra Gold Inc.’s Mount Milligan Copper-Gold Mine. In addition, Phase 1 drilling at Worldstock is now complete and assays are expected in the coming weeks.

At the Worldstock property, 10 RC holes were completed totaling 1,049 metres, with selected holes having been sent for laboratory analysis after positive on-site X-Ray Fluorescence spectrometer analyses. Several target areas were tested across the Worldstock property, with moderate to abundant sulphides being encountered in 8 out of 10 holes. In multiple cases, the levels of copper anomalism increased with depth down-hole, supporting the interpretation that the Worldstock may represent the upper reaches of a porphyry copper-gold system.

At the Weedon property, the Company will be drill-testing the T1 target area and targets in the vicinity of T1 which were the focus of previous exploration campaigns by Cominco in 1991, Geoinformatics in 2007 and Teck Resources in 2010/2011. The T1 target area is covered by glacial overburden in excess of 50 metres, however through the use of passive seismometers Pacific Empire was able to outline areas where bedrock penetration is achievable with the Company’s existing RC drill. The Company’s intent is to be the first explorers in this area to successfully reach bedrock in this highly prospective area.

### **T1 Target Highlights at Weedon Property**

- 1.5 x 1 km IP chargeability high
- 1 km diameter conductivity high
- 1.3 x 1 km magnetic high
- 500 m diameter Cu-Au-Mo Ah soil geochemical anomaly

*“As we gear up to drill the Jean Marie property in the coming weeks, we are excited to test the highly compelling T1 target at Weedon,” commented Pacific Empire’s President and CEO, Brad Peters. “We expect to receive drill permits for Jean Marie in the coming weeks, and although Jean Marie will be our focus in 2020, Weedon remains untested with drilling, despite previous exploration programs by sophisticated groups. The Weedon Property demonstrates the potential to make a blind discovery in an easily-accessible area with robust existing infrastructure.”*

#### Forward-Looking Statements

*Information set forth in this news release may involve forward-looking statements under applicable securities laws. Forward-looking statements are statements that relate to future, not past, events. In this context, forward-looking statements often address expected future business and financial performance, and often contain words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "might", "could", "should", or "will" be taken or occur, or other similar expressions. All statements, other than statements of historical fact, included herein including, without limitation, are forward-looking statements. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the need for additional financing; operational risks associated with mineral exploration; fluctuations in commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain officers, directors or promoters with certain other projects; the absence of dividends; competition; dilution; the volatility of our common share price and volume and the additional risks identified the management discussion and analysis section of our interim and most recent annual financial statement or other reports and filings with the TSX Venture Exchange and applicable Canadian securities regulations. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made, and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by applicable securities laws. Investors are cautioned against attributing undue certainty to forward-looking statements.*
